

IOSH Safety, Health and Environment for Construction Workers

Course Code: ISHECW

Introduction

This one-day Safety, Health and Environment for Construction Workers course provides essential knowledge for anyone who is involved in construction activities.

It's very much focused on helping delegates to understand what they need to know, and how they can benefit from working in a healthier and safer way.

The course will provide workers with the knowledge that they'll be able to use in their day to day roles. The Safety, Health and Environment for Construction Workers course can be delivered and customised to suit workers from a single company.

Content

Health and safety issues to be managed in the construction industry to protect employees, contractors, neighbours and others

The basics of local law

The importance of risk assessments and method statements and the development process

Site requirements for the welfare of construction workers on site

Hazards and controls associated with construction sites and activities including working at height and confined spaces

Site environmental management including management of waste and ecology

Aim

To provide you or your employees with the training to ensure you understand the basics of safety, health and environmental regulations.

Participants

Anyone who wants to or works on or around a construction site or has cause to visit the site in the course of their work.

Certification

Upon successful completion of the exam paper delegates will receive an IOSH certificate.
