

Low Voltage Cable Jointing Refresher Course

Course Code: CJCLVR

Introduction

The Low Voltage Cable Jointing Refresher is aimed at experienced Cable Jointers who require a refresher.

The course will contribute towards demonstrating your business is committed to compliance with safety and good work place practice.

It is not a training course for inexperienced cable jointers or those who require training to become a Cable Jointer.

The candidates for this course must be existing Cable Jointers within your organisation and hold current authorisation.

The refresher is an excellent way to keep upto date and discuss safe working methods.

Content
