

Electricity at Work Regulations (EAWR) 1989 Training Course

Course Code: EAWR

Introduction

This course explains the requirements and the implications of the Electricity at Work Regulations 1989 for those responsible for electrical safety at work. The duties and responsibilities of everyone affected by the legislation are clearly outlined.

Content

- * Hazards & Effects of Electricity
- * The Purpose & Back ground of the Regulations
- * Scope of the Regulations
- * Employers, Employees & Contractors Responsibilities
- * Review of Regulations
- * Legal Implications of non Compliance

Aim

To provide delegates with an understanding of the Electricity at Work Regulations 1989 and the application of the regulations throughout industry, commercial premises, shops, offices, schools, hospitals etc. operating at various voltage levels on both high and low voltage systems.

Participants

All levels of management and operational team members who work with electricity.

The course will outline the fundamental requirements and managerial responsibility for the safe use of electricity and electrical equipment.

Certification

Candidates who successfully complete the theoretical competence assessments will receive a “Competence” certificate.
