

Fire Safety Awareness Course

Course Code: FSA

Introduction

The Fire Awareness course gives all successful candidates a good knowledge of the risks and hazards associated with fire, best practice in fire prevention and the skills of how to react in the event of a fire incident.

We will encourage candidates to think safely and use common sense principles to avoid unnecessary hazards

Fire Safety Awareness introduces learners to the risks associated with fire and the control measures available and provides a valuable introduction to the key principles of fire safety.

Content

- How fires are caused in the workplace
- The components of the fire triangle
- The hazards during and after a fire
- The characteristics of fire and smoke spread
- Methods used to identify and control fire hazards
- Means of escape in relation to fire hazards
- Methods of fire detection and raising the alarm
- How fires are extinguished
- How to use portable fire-fighting equipment safely
- Common fixed fire-fighting systems
- Duties of employers and employees in relation to fire safety
- How to undertake a simple fire safety inspection in the workplace
- The stages involved in a fire risk assessment
- The role of fire wardens in the workplace

Aim

The Fire Safety Awareness provides a valuable introduction to the key principles of fire safety for

employees to demonstrate an understanding of avoidance of fires and how to react when fires are identified.

Participants

Everyone in the workplace should be trained in Fire Safety, as per the Fire Safety Regulatory Reform Order 2005.

This course is of particular importance to those with designated responsibility for fire safety in their work place area. For example Fire Wardens, Authorised Persons, Premise Managers and Duty Holders.

Certification

Candidates will receive a Certificate of Competence on successful completion of the course assessment.
